## 7. Number of employees

The number of the employees as at March 31, 2026 was 25

## 8. Comparability of information on the Separate Financial Statements

Respective information and figures in the Company's Separate Financial Statements for the year ended December 31, 2025 are comparative.

### II. Accounting period, currency used in accounting

#### 1. Accounting period (The Company's accounting period begins on 01/01 and ends on 31/12 every year)

#### 2. Currency used in accounting

The currency used in accounting is Vietnam dong ("VND").

### III. Applied accounting regime and standards

#### 1. Applied accounting regime and standards

The Company applies the Vietnamese Accounting System in accordance with Circular No. 99/2025/TT-BTC dated October 27, 2025 issued by the Ministry of Finance, which provides guidance on the corporate accounting regime.

#### 2. Statement on the compliance to Accounting Standards and Accounting regime

The Company has adopted Vietnamese Accounting Standards and the related guidance issued by the State. The financial statements are prepared and presented in full compliance with all applicable standards, implementation guidance and the prevailing accounting regulations.

### IV. Accounting policies, estimates and relevant legal regulations

#### 4. Principle for recognizing cash and cash equivalents

Cash and cash equivalents include cash on hand, demand deposits, and short-term investments (no more than 3 months) that are highly liquid, easily convertible into cash, and have low risk associated with price fluctuations.

#### 5. Accounting principle for financial investments

##### b) Held-to-maturity investments

Held-to-maturity investments include investments that the Company intends and is able to hold until maturity. The Company's held-to-maturity investments consist of term deposits in banks.

##### c) Investment into subsidiaries, associates

###### *Investment into subsidiaries*

Subsidiaries are companies under control of the Company. The control means the Company is able to control financial policies and operations of investee companies in order to get economic benefits from these companies.

###### *Investments into associates*

An associate is an entity in which the Company has significant influence but not control over the financial and operating policies and that is neither a subsidiary nor a joint venture of the Company. Significant influence is the power to participate in the financial and operating policy decisions of the investee but is not control or joint control over those policies.

Investments in subsidiaries and associates are initially recorded at cost, including the purchase price or capital contribution plus costs directly related to the investment. In case of investment in non-monetary assets, the cost of the investment is recorded at the fair value of the non-monetary assets at the time of arising.

Dividends and profits from periods prior to the investment being purchased are recorded as a reduction in the value of the investment itself. Dividends and profits from periods subsequent to the investment being purchased are recorded as revenue.

Dividends received in shares are only recorded as the number of shares increased, not record the value of the shares received.

Provision for investments in subsidiaries and associates is appropriated at the time of preparing Separate Financial Statements when investments in subsidiaries and associates have decreased compared to original cost an amount equal to the difference between the actual capital contributions of the parties at the subsidiaries and associated companies and the actual equity multiplied by the Company's capital contribution ratio compared to the total actual capital contributions of the parties at the subsidiaries and associated companies.

Increase, decrease in the provision for investment in subsidiaries and associates companies that must be appropriated at the closing date of preparing Separate Financial Statements is recorded in financial expenses.

#### *d) Investments into other entities*

Investments in equity instruments of other entities include investments in equity instruments but the Company does not have control, joint control or significant influence over the investee.

Investments in equity instruments of other entities are initially recorded at cost, including the purchase price or capital contribution plus direct costs related to the investment. Dividends and profits from periods before the investment is purchased are recorded as a reduction in the value of the investment itself. Dividends and profits from periods after the investment is purchased are recorded as revenue. Dividends received in shares are only recorded as the number of shares increased, not the value of the shares received.

An allowance for impairment of investments in equity instruments of other entities is recognised at the reporting date in the separate financial statements when such investments are impaired compared to their cost. The Company determines and recognises the impairment allowance as follows:

- For investments whose fair value cannot be determined at the reporting date, provisions are made at an amount equal to the difference between the actual capital contributions of the parties at other entities and the actual equity multiplied by the Company's capital contribution ratio compared to the total actual capital contributions of the parties at other entities

Increase, decrease in the provision for investment in other entities that must be appropriated at the closing date of preparing Separate Financial Statements is recorded in financial expenses.

#### **6. Accounting principle of accounts receivable**

Receivables are stated at book value less provision for doubtful debts.

Classification of receivables is made on the following principle:

- Trade accounts receivable consist of receivables with their commercial nature arising from transactions with their purchasing-selling nature between the Company and buyers who are independent entities from the Company.
- Other receivables consist of receivables with their non-commercial nature, not related to transactions with their purchasing-selling nature.

Provision for doubtful debts is made for each doubtful based on age of each debt amounts or estimated loss that may incur because debtors are insolvent under liquidation, bankruptcy or similar hardship.

Increase, decrease in provision for doubtful debts to be made at the accounting period end shall be recognized into general administration expenses

#### **7. Accounting policies for inventories**

- Principle for recognizing inventories

Inventories are recognized at the lower of cost and net realizable value. The cost of inventories consists of expenses of acquisition, processing and other directly related expenses incurred to bring inventories to their present location and condition.

- Costing method for inventories;

Net realizable value is determined as the estimated selling price of inventories during the normal business period minus the estimated costs to complete and sell them.

- Inventory accounting method;

The Company's inventory impairment provision is appropriated in accordance with current accounting regulations. Accordingly, the Company is allowed to appropriated an allowance for obsolete, damaged, or substandard inventory and in cases where the historical cost of inventory is higher than the net realizable value at the end of the fiscal year.

- Policy for allowance for inventory write-down.

The Company recognises an allowance for inventory write-down in accordance with prevailing accounting regulations. Accordingly, the Company provides for obsolete, damaged or slow-moving inventories, and when the carrying amount of inventories exceeds their net realisable value at the end of the financial year.

#### **8. Accounting policies for and depreciation of tangible fixed assets (including bearer plants and working animals), intangible assets, right-of-use assets and investment property.**

*Tangible fixed assets:*

Tangible fixed assets are recognized at their historical cost, presented in the Separate Balance Sheet under the items of historical cost, accumulated depreciation and carrying amount.

The historical cost of procured tangible fixed assets includes their purchase price (excluding trade discount or other discount), taxes and directly related costs to bring such assets into the ready-for-use state.

Historical cost of fixed assets which are constructed by contractors includes value of completed and handover works, directly-related costs and stamp duty.

The historical cost of procured tangible fixed assets include actual price of tangible fixed assets which are selfconstructed or self-made and their installation and commissioning expense.

The expenses incurred after the initial recognition of tangible fixed assets are recorded as the increases of historical cost of assets when these expenses are sure to increase economic benefits in the future. The incurred expenses which do not satisfy the above conditions are recognized into operating expenses in the period.

The Company applied straight-line depreciation method to tangible fixed assets. Tangible fixed assets are accounted and classified into groups by their nature and purpose of utilization in the Company's production and business operation, including:

Type of fixed asset	Depreciation duration (years)
Land, building and architectural objects	25
Transportation means	6
Managerial equipment, tools	3-6

Loss or gain resulting from sales and disposals of tangible fixed assets is the difference between the net proceeds from sales or disposals of assets and their carrying amount and is recognised in the Income Statement.

#### *Intangible fixed assets:*

Intangible fixed assets are recognized at their historical cost, presented in the Separate Balance Sheet under the items of historical cost, accumulated amortization and carrying amount.

Historical cost of acquired intangible fixed assets consists of their total purchase price to bring the assets to their state of ready-to-use. The costs arising after initial recognition of intangible fixed assets are recorded as production costs in the period excluding specific costs of a specific intangible asset, enabling an increase in the future economic benefits.

When an intangible fixed asset is sold or disposed, historical cost and accumulated amortization are written off and gain or loss from disposal is recognized into income or expense in the year.

Intangible assets of the Company include software programs and Vinaconex brand.

Software programs

Costs in relation to translation software programs are not an integral part of the relevant capitalized hardware. Historical costs of computer softwares is the whole expenditure paid by the Company until the softwares are put into use. Computer softwares are amortized on straight line basis in 03 years.

Vinaconex brand

Historical costs of Vinaconex brand is all expenses that the Company has spent up to the time the brand is put into use. The Vinaconex brand is amortized using the straight-line method in 5 years.

#### *Principle for investment property recognition:*

Investment properties of the Company is the land use right, right to building, a part of building or infrastructure under possession of the Company or under finance lease to be used to gain benefits from lease or appreciation. Investment properties are presented at historical cost less accumulated depreciation. Cost of an investment property means the amount of expenses paid or the fair value of other consideration given to acquire an investment property at the time of its acquisition or construction.

Subsequent expenditure relating to an investment property that has already been recognized should be recorded into expenses, except when it is probable that future economic benefits will flow to the enterprise in excess of the originally assessed standard of performance of the existing investment property, then an increase in the cost of the investment property shall be recorded

At the sale of investment properties, historical cost and accumulated depreciation is written off and gain/loss is recorded into income or expense in the year.

The transfer from owner-occupied property or inventory to investment property shall be made only when the owner finishes using that property and leasing it to other party for operation or upon completion of construction stage. Investment property shall be converted into owner-occupied property or inventory when the owner begins to use this property or held for sale purpose. The transfer of use purpose between investment property and owneroccupied property or inventory does not change the net book value of the transferred asset or the historical cost of the property at its transfer date.

Investment properties held for rental purposes are depreciated using the straight-line method over their estimated useful lives. The depreciation years of investment properties are as follows:

Type of fixed assets	Years
Building	25

## **12. Accounting principle for liabilities**

Liabilities are amounts payable to suppliers and other subjects. Liabilities comprise trade accounts payable and other payables.

Liabilities are not recorded at lower amounts than payment obligation.

Classification of liabilities is made on the following principle:

- Trade accounts payable comprise of liabilities with their commercial nature arising from purchasing goods, services, assets and the suppliers are independent from buyers, including payables between parent company and its subsidiaries.
- Other amounts payable comprise amounts payable with their non-commercial nature, not related to transactions of purchasing, selling and supplying goods, services.

Liabilities are monitored by details of each item and due date.

#### **14. Principle for recognizing accrued expense**

The Company's payable accrued expenses are the construction costs of the Apartment project at 136 Ho Tung Mau and other expenses are actual expenses that have arisen in the reporting period but have not been paid due to lack of invoices or insufficient accounting records and documents, recorded in the production and business expenses of the reporting period. The interest expense payable is determined based on the contract, loan

Accrued expenses on production and business expenses in the period are calculated strictly with reasonable and reliable evidence on the expenses to be accrued in the period to ensure the accounting expenses payable to be accounted will match the actual costs incurred.

#### **16. Principles and Methods for Recognizing Provisions for Payables**

This reflects the existing provisions for payables, the situation of provision establishment, and the use of provisions for payables by the enterprise. The recorded value of a provision for payables is the best reasonable estimate of the amount required to settle the present obligation as of the end of the annual or interim accounting period.

Provisions for payables are established when preparing financial statements. For construction warranty provisions, they are established for each construction project and recorded at the end of the annual or interim accounting period.

#### **18. Principles for Recognizing Loans and Finance Lease Liabilities**

Loans are recognized based on receipts, bank documents, agreements, and loan or finance lease contracts. Loans are tracked by individual entities and terms.

#### **19. Principles for Recognizing and Capitalizing Borrowing Costs**

Borrowing costs are recognized as production and business expenses in the year incurred, unless capitalized in accordance with the accounting standard "Borrowing Costs." Borrowing costs directly related to the acquisition, investment in construction, or production of assets requiring a substantial period to complete and be ready for use or sale are added to the asset's original cost until the asset is ready for use or sale. Income generated from the temporary investment of borrowings is deducted from the related asset's original cost. For specific loans used to construct fixed assets or investment properties, interest is capitalized even if the construction period is under 12 months.

#### **21. Principle for recognizing owner's equity**

Capital investment of the Company's owners is recognized by shareholders' actual capital contribution. Share premium is recorded as the difference between the issue price and the par value of shares when first issued, additional issued, the difference between the reissue price and the book value of treasury stock.

Treasury shares purchased before the effective date of the Securities Law (January 1, 2021) are shares issued by the Company and repurchased by the Company itself, but not yet canceled and will be reissued within the period stipulated by securities law. Treasury shares purchased after January 1, 2021 will be canceled and the equity adjusted downwards.

Retained earnings are the profit amounts from enterprise's business operation after deducting CIT expense this year and the retroactive adjustments due to changes in accounting policies and the retroactive adjustment of material misstatements in the previous years.

Profit after corporate income tax is allocated to shareholders right after funds are made for under the Corporation Article of the Company as well as legal regulations and upon approval of the Annual General Meeting

Dividends are recognized as liabilities after the Company's Board of Directors announces the dividend distribution and the Vietnam Securities Depository and Clearing Corporation announces the record date for receiving dividends.

#### **22. Principle and method of recognizing revenue, other income**

The company's revenue includes: revenue from construction services, revenue from real estate leasing, revenue from interest on bank deposits.

##### *Revenue from services rendered*

Revenue from a service rendered is recognized when the outcome of such transaction is determined reliably. In case such transaction of services rendered is related to many periods, the revenue is recognized in the period corresponding to the completed work item as at the cut-off date of the Financial Statements for such period. Revenue from service provision is determined when it satisfies all conditions below:

- Turnover is determined with relative certainty. In case the contract specifies that buyers have the right to return services that were bought under specific terms, the revenue is only recognized when these specific terms no longer exist and the buyers have no right to return services rendered;
- It is possible to obtain economic benefits from the service provision transaction;
- The work volume completed on the cut-off date of the Financial Statements can be determined; and
- The costs incurred from the transaction and the costs of its completion can be determined.

#### *Revenue from construction activities*

When the outcome of contract performance can be reliably estimated:

- For construction contracts that stipulate that the contractor is paid according to the planned progress, revenue and related expenses are recognized corresponding to the portion of work completed, as determined by the Company itself on the closing date for financial reporting.
- For construction contracts that stipulate that the contractor is paid based on the value of the work performed, revenue and related expenses are recognized corresponding to the portion of work completed as confirmed by the client and reflected in the issued invoice.

Increases or decreases in construction volume, compensation payments, and other income are only recognized as revenue when agreed upon with the customer.

When the outcome of a construction contract cannot be reliably estimated, then:

- Revenue should only be recognized up to the extent of the contract costs incurred where repayment is relatively certain.
- The cost of the contract is only recognized as an expense incurred.

The difference between the cumulative total revenue of the construction contract as recorded and the cumulative amount recorded on the payment invoice according to the planned progress of the contract is recognized as a receivable or payable according to the planned progress of the construction contracts.

#### *Revenue from leasing operating properties*

Revenue from operating leases is recognized using the straight-line method over the lease term. Advance lease payments for multiple periods are allocated to revenue in proportion to the lease term.

#### *Interest income*

Interest amounts are recognized on accrual basis, being determined on balances of deposits and actual interest rate in the period.

Advances from customers are not recognized as revenue in the period.

#### **24. Principles of Accounting for Cost of Goods Sold**

Reflects the cost of goods, products, services, and investment properties; the production costs of construction products sold during the period; costs related to real estate investment business activities; and costs of transferring or liquidating investment properties.

#### **25. Principle and method of recognizing financial expense**

Financial expense recognized in Separate Income Statement is the total financial expense incurred in the period, without offset with revenue from financial income, including interest expenses.

#### **26. Accounting Principles for Selling Expenses and Enterprise Management Expenses**

Selling expenses reflect the actual costs incurred in the process of selling products, goods, and providing services. These include costs for product promotion, product introduction, advertising, sales commissions, product warranty costs (excluding construction activities), storage costs, packaging, transportation, etc.

Enterprise management expenses include costs for the salaries of employees in the management department (wages, salaries, allowances, etc.); social insurance, health insurance, union funds, unemployment insurance for management employees; office supplies, labor tools, depreciation of fixed assets used for enterprise management; land rent, license tax; provisions for doubtful debts; outsourced services (electricity, water, telephone, fax, property insurance, fire insurance, etc.); other cash expenses (client reception, customer meetings, etc.).

#### **28. Principles and Methods of Recognizing Current Corporate Income Tax Expense and Deferred Corporate Income Tax Expense**

Current corporate income tax expense is the corporate income tax payable based on taxable income for the year and the applicable corporate income tax rate.

Quarterly, accountants calculate the provisional corporate income tax to be paid as current corporate income tax expense.

Unit: VND

- Notes to the figures and other explanations

Fair value of investment property:

According to the provisions of Vietnamese Accounting Standard No. 05 - Investment Property, the fair value of investment property at the end of the reporting period must be presented. However, the Company has not yet determined this fair value, so the fair value of investment property at the end of the reporting period has not been presented in the Notes to the Financial Statements. To determine this fair value, the Company will have to hire an independent consulting company to assess the fair value of investment property. Currently, the Company has not found a suitable consulting company to perform this work.
